

**PHYSICAL PLANT BUILDING**—Shown here is the architect's drawing of the new BYU Physical Plant Bldg. Located on 9th North street south of the Smith Industrial Arts Bldg., the new structure will include

83,853 square feet of floor space. Physical Plant facilities, now scattered over the campus, will be concentrated in the new building.

## L. firm gets Physical Plant contract

**new Bureau**  
Contract for construction of a  
Physical Plant Building at BYU

## Accidents injure 4 students

At least four homework  
BYU students were injured  
in car accidents during  
Christmas holidays, ac-  
cording to Alma W. King,  
adviser on special prob-  
lems.

Three automobile wrecks  
were reported thus far,  
said one. One accident  
occurred in Kanab, Utah,  
involving two cars loaded  
with BYU students.

**CAR DRIVEN** by Roy  
in King turned back to a  
station where one of its  
engines had forgotten some-  
thing. While it was pulled over  
the side of the road, a car  
driven by Robert Kent Peter-  
son hit it from behind, said  
L. King.

Those injured in this acci-  
dent were Joanne Wildman,  
from West Covina, Cal.  
and skull fracture, broken  
leg and cheekbone. How-  
ever, she was released to her  
parents for the Christmas hol-  
iday.

**ENNIS HARVEY SMITH**,  
from West Covina, Cal.,  
suffered nose and lacerations  
on his nose and forehead.

has been awarded to Paulsen  
Construction Co. of Salt Lake  
City. It has been announced  
by President Ernest L. Wilkin-  
son. The new building will  
house the entire maintenance,  
supply and planning operations  
of the University.

The new building, planned as  
a hollow square two stories  
high, was designed by Lorenzo  
S. Young and Partners, archi-  
tects, who also designed the  
new BYU million-volume li-  
brary.

**IT WILL BE** located at the  
intersection of 9th North and  
the east campus boulevard, south  
of the new Smith Industrial Ar-  
tistics Bldg.

The main entrance will be on  
the west side, with secondary  
entrances on the south. It will  
be constructed of golden buff  
brick and white stone, with ex-  
tensive use of high windows.

"Such a Physical Plant Build-  
ing is a serious need on campus  
at present," President Wilkinson  
asserted. "The Physical Plant  
operation is scattered in 26 tem-  
porary buildings occupying 38,  
800 square feet of floor space  
in many areas of the campus."

**PRESIDENT WILKINSON**  
explained that two purposes  
will be served by the construction  
of the new building. In addi-  
tion to providing central-  
ized, efficient facilities for the

Physical Plant Dept., it will re-  
lease several buildings for use  
by the College of Physical and  
Engineering Sciences.

Some of the old war-surplus  
type buildings will be scrapped,  
he said, but others will fill a  
great need by the BYU sci-  
entists and engineers for storage,  
research and academic space.

The new utilities building will  
be 244 feet square on the out-  
side dimension and 144 square  
feet on the inside dimension. In  
other words, it will be a building  
50 feet wide extending  
around an open court in a com-  
plete square.

There will be 20,736 square  
feet of black topping in the in-  
ner court.

**THE FIRST FLOOR** will con-  
tain 42,313 square feet of floor  
space.

(Continued on page 4)

## Music faculty set Thursday for recital

Three selections will be played  
Thursday in a faculty re-  
cital at BYU.

Open to the public, the re-  
cital will be at 7 p.m. in the  
East Lounge of the Social Hall.

"Sonata for Viola and Pi-  
ano," a piece in four move-  
ments by Robert Cundick of  
the music faculty, will be per-  
formed with Karen Lynn on  
viola and Mr. Cundick on  
piano. The four movements  
are "Allegro Moderato," "Al-  
legro Vivace," "Larghetto" and  
"Allegro."

**SECOND ON THE program**  
will be "Sonata in D Major,  
K. 576" by Mozart. Playing the  
three movements, "Allegro,"  
"Andante" and "Scherzo," will  
be Barbara Allen Crockett.

"The final number will be  
"Trio in B Major Op. 40" by  
Brahms, with four movements,  
"Andante," "Scherzo," "Adag-  
lio mesto" and "Allegro con  
brio." It will be performed by  
Lawrence Sardonio on violin,  
Richard Ballou on horn and  
Robert Cundick on piano.

## History prof receives grant

A BYU researcher has been  
named one of 35 in the United  
States and Canada to receive a  
study grant from the American  
Council of Learned Societies.

Dr. George M. Addy of the  
BYU Department of History was  
awarded the grant to investi-  
gate "The Enlightenment in the  
University of Salamanca, 1783-  
1813."

**DR. ADDY** explained that dur-  
ing those years a reformation  
occurred at the Spanish univer-  
sity which involved a reorgani-  
zation of curriculum and intro-  
duction of new classes. "This  
is significant because it set the  
pattern for other Spanish and  
Latin American universities," he  
noted.

After receiving his bachelor's  
and master's degrees at BYU,  
Dr. Addy did doctoral work at  
Duke University, receiving the  
Ph.D. in 1967.

**DONOR OF THE grant**, the  
American Council of Learned  
Societies is a private non-profit  
organization of 30 national schol-  
arly associations devoted to the  
advancement of humanistic  
studies in all fields of learning.

Awards this year were given  
to scholars at 28 universities and  
colleges and one other academic  
institution in 16 states and  
Canada.

## Three jazz groups slated to appear for Friday festival

A jazz festival featuring some  
of the area's top swing mu-  
sicians will perform Friday at  
7:30 p.m. in the Smith Auditori-  
um, according to Laurence Yorg-  
eson, who is in charge of the  
program.

**THREE JAZZ groups** will at-  
tempt to lift students out of  
their post-holiday lethargy. One  
will have 16 members, another  
12 and the third will be a small  
combo, he said.

In recent years, some jazz has  
graduated from the "joints" and  
has put on a high hat and tails.  
In the past, jazz lovers had to  
attend local night spots to hear  
it, said Yorgeson.

## Y scholars win \$1500 in contest

BYU may not have had the  
chance to participate in any of  
the college football bowl games  
played during the vacation but  
its team of intellectuals brought  
home top honors after winning  
the General Electric TV College  
Bowl contest in New York City  
Sunday.

The four senior students com-  
peted against a team from Long  
Island University, winning a  
\$1,500 scholarship grant for  
BYU.

**FINAL SCORE** in the meet  
was 105 to 90 in favor of BYU  
but LIU was at one time ahead  
by 35 points and the two teams  
were tied at halftime with 50  
points each.

The team will fly to New York  
City again Friday for another  
battle of the scholars against  
Villanova University of Phila-  
delphia, Penn.

Three of the team members  
are English majors. They are  
Dave Stone and Mrs. Jojean  
Loflin, both of Provo, and Robert  
Despain of Salt Lake City.  
Team captain Todd Britsch is a  
political science major from  
Provo.

**DIRECTOR OF THE BYU Hon-  
ors Program**, Robert K. Thom-  
as, accompanied the team as  
coach.

"I was tremendously proud  
of the compulsion of the team  
under the most pressure I have  
ever seen," Prof. Thomas said.  
The team should do even bet-  
ter in next week's competition,  
according to Britsch.

**"WE MAY MEET** a group  
knows more than we do, but I  
don't think we'll meet a faster  
team than LIU," he said.

The LIU team was one of the  
fastest ever to appear on the  
program. BYU participants were  
told after the show.

The two teams met Sunday at  
11 a.m. EST in the TV studios  
and started their first of four  
practice sessions before the pro-  
gram was televised at 5:30 p.m.  
to 8:30 p.m. MST), said Mrs. Lof-  
lin.

**NONE OF THE questions** on the  
program were repeated from the  
practice sessions, she said.  
When asked about preparations  
for the next Bowl game, Mrs.  
Loflin said, "We thought we  
would do something different  
and go to class."

While in New York City, the  
team and its coach attended  
several plays on Broadway and  
toured the city.

If the winning streak continues  
for BYU, the team will be  
eligible to participate in the  
College Bowl competitions after  
which it will retire undefeated  
and BYU will be awarded an  
additional \$1,500 for scholar-  
ships.

## Youtheatre seeks father of country

The BYU Youtheatre is look-  
ing for George Washington.

If you would like to become  
the father of this country, you  
don't have to look exactly like  
John Jay. Homecoming group  
will assist you—apply to Dr. Albert  
O. Mitchell, Dramatic Arts Dept.,  
Call extension 2501 or FR 3-  
7350.

**YOU THEATRE** will celebrate  
Washington's birthday by pre-  
sented a new play entitled  
"John Jay Homecoming" at  
Washington," Dr. Mitchell said.

Several other good acting  
parts are available including the  
part of the spy, he said.  
Tryouts will be Monday at 8  
p.m. in College Hall and Tues-  
day at 4 p.m. in 80 Jesse Knight  
Bldg.

... a few final comments' ...

## Profs continue Constitution debate

After being exposed to Prof. Hyrum L. Andrus' "spectacular head-turning ability"—a term we still believe is both applicable and quite down-to-earth—we had little hope that our statements would be given more reverential or more accurate treatment than that given by him to his own sources. Even this glimmer of hope was dashed by his recent reply. Despite Professor Andrus's warning that "no reputable scholar" would disagree with him, we feel it necessary to make a few final comments.

Prof. Andrus's reply to our criticisms was interesting and well-written but for the most part irrelevant and often distorted. We did not seek to defend or attack "the welfare state," "social programs for the people," "the socialized father" or any other types of social, political or economic program.

**OUR POINT WAS AND** still is that Professor Andrus arrived at many conclusions in his Dec. 7 article which were not justified by the sources to which he referred.

As an example of distortions, Prof. Andrus, in his enthusiasm to point out "our" errors, had us claiming that, "Because Joseph Smith wanted to restore the original ideal of constitutional government in which he felt that the state was then being socialized," and curiously concludes, as if it were his own position that, "there are other abuses to the ideal of government" to which the Prophet objected, apparently forgetting that we had quoted extensively from Joseph Smith to make precisely this point, and that it was Hyrum L. Andrus who said, "It is quite another thing to advocate the greater socialization of the Federal Government."

**"BY CONTRAST,** (to the advocacy of greater socialization of the Federal Government) the prophesy is found in LDS literature that the Saints must, one day, play a leading role in the Constitution to its original concept. . . . Joseph Smith advocated such a return in his day." If that isn't a reverse twist, we have never seen an acrobat.

It seems unnecessary to pursue this part of the matter further. The reader who is in doubt is advised to reread Prof. Andrus's Dec. 7 article, read carefully the scriptural references, Madison's Federalist No. 10, and Joseph Smith's "Views on the Powers and Policies of the Government of the United States," and then turn to our comments on Dec. 14, and Prof. Andrus's reply of Dec. 15. We will confine ourselves to a few comments on the U.S. Constitution and on the Law of Consecration and Stewardship.

**IN HIS DEC. 7** article Prof. Andrus said, "It follows that governmental measures that foster social programs for the people are basically incompatible with the Constitution."

We asked the basic question which Prof. Andrus disdained to answer, "At what point did we depart from the Constitution?" The Constitution has been amended 22 times by the process prescribed within it. Prof. Andrus evaded the issue by answering "the Bill of Rights and the subsequent amendments (and all subsequent amendments) . . . were intended to strengthen further the freedom that welfare measures now militate against."

Does this mean that these other amendments do not affect freedom either way or does this mean that they militate against freedom and are placed in that unbounded box labeled "welfare measures"?

**CERTAINLY THERE** are those who might cogently argue that the 18th amendment which prohibited the manufacture, sale or transportation of intoxicating liquors with the United States abrogated free agency. The state in this instance regulated and infringed upon man's agency, "more than a system founded upon individual freedom." But does it follow that therefore "the state became something 'more' than the Founding Fathers had intended" and that the amendment to God's perfect system of government for men" as Prof. Andrus interprets that system in the light of the 98th section of the Doctrine and Covenants?

If his answer is affirmative, as it must be if he is consistent, then how does he explain the fact that our Prophet, Seer and Revelator strongly advised all members

of the Church to vote for the passage of this amendment and in no uncertain terms opposed its repeal?

We also raised the question whether it was the fact that the Constitution has been differently interpreted in different periods that disturbs Prof. Andrus. There is even some debate as to whether the Founding Fathers originally intended that the Supreme Court should have the power to review the constitutionality of acts by Congress.

**NEVERTHELESS, THE** Constitution has been interpreted through various prisms of judicial review from the case of *Marbury v. Madison* in 1803 to the present. And all of the board interpretations have by no means been recent.

Many well-known students of the Constitution (who are no doubt, "not reputable scholars" in Prof. Andrus's eyes) are of the opinion that the great strength of the U.S. Constitution is the vitality which has enabled it to remain a viable and isolated agrarian frontier society of 1789 to meet the social and economic problems of a highly complex, world-interdependent, industrial society of 1961. Who knows but this may be an evidence of inspiration.

It seems to us a bankrupt philosophy to say of any social problem, "George Washington didn't deal with that problem. Therefore, I won't."

**PROF. ANDRUS'S HINTS** darkly of a Utah Congressman flagrantly using Joseph Smith's proposal to give the federal government additional power to support "greater grants of power to the federal authority today," thus implying that the congressman advocated "greater socialization of the Federal Government."

What was this grant of additional power? Was it a proposal to set aside certain lands in southern Utah for recreational use, or a proposal to establish a new post office in Geopha?

We do not defend every social welfare program. Indeed we find ourselves highly critical of some, though we are not in complete agreement between ourselves as to which are desirable or undesirable. Hence it was amusing to be accused by Prof. Andrus of attempting "to prove whatever economic and political preconceptions (we) might possess" concerning these programs.

However, we are prepared to criticize or defend such programs on social and economic grounds, not on whether they existed and were being dealt with in 1789 or 1833. In fact we find ourselves in full accord with Prof. Andrus's highly touted constitutional authority James Madison when he said regarding the bestowal of power to the central authority, "In all cases where power is to be conferred, the point first to be decided is, whether such a power be necessary to the public good; as the next will be, in case of an affirmative decision, to guard as effectually as possible against a perversion of the power to the public detriment." (The Federalist No. 11)

**IT MAY SURPRISE** DR. Andrus to be told that we do have some slight familiarity with the Doctrine and Covenants and with the economic program advocated therein. It is not that program but Prof. Andrus's alleged "evidence" which we find ill-defined.

We suspect our allegiance to this program and our faith in its ultimate triumph may be almost as great as that of Prof. Andrus. However, we also suspect that an economic analysis of the program might lead to conclusions which we would find surprising.

Finally, Prof. Andrus ends his reply with the challenge, "Where if not among you brethren, can the studentbody expect to be taught these fundamental economic principles upon which Zion must be built? Is this, or is this not the 'Lord's University'?"

We can only answer that we feel a certain obligation to inform our students that this is a complicated world full of many difficult and sometimes almost unsolvable problems. We can offer only a few exposure to some of these social and economic problems and an analytical framework in which they can be considered and attacked. For those who want the pat answer and the easy slogan, we know where to refer them.

Garth L. Mangum  
Richard W. Wirthlin  
Associate Professors of Economics

## Husky book necessary for debate, says Andrus

From the holocaust of emotion that has erupted certain of my colleagues over my editorial of Dec. 7, on Constitution, it would seem that I should never have gone to print on this subject without writing a husky book w six inches of documentation on every page.

At the request of the former editor of the Daily Universe, I sought in a limited space to identify certain fundamental points of the LDS belief on the Constitution.

**FIRST, I OBSERVED** that it is God's sanctioned program of government and should be extended to all mankind citing D.C. 98:5, 7; 101:77-78. These statements from Lord are documentation enough for me.

Second, I indicated that the Constitution is primarily concerned with upholding individual freedom and justice. It is founded upon a legalistic philosophy incompatible with social measures that tend to force conformity. Here I cited D.C. 101:77-78, commenting that Madison's Federal No. 10 expresses a similar view, concluding that this philosophy is incompatible with that of the welfare state.

**THIRD, I STATED** that the Constitution, though inspired, was not necessarily a perfect document and should be developed along the lines of its original inspiration. He also, I indicated that we have departed from the philosophy of freedom sanctioned by the Lord, and as Latter-day Saints we should be aware of such departures and ever seek build our political system on the philosophy of individual freedom.

Finally, I expressed the concept found in LDS thought that the Constitution is a stepping-stone to a more perfect system—the Kingdom of God—which will one day be developed under the authority of the Priesthood, and with cooperation of good men of other religious faiths extend throughout the world.

These four points only, I intended briefly to discuss, and stated specifically that the editorial did not pretend deal with all issues related thereto; nor did I write with intent to debate these or any other issues.

**ON POINT FOUR ABOVE,** I commented that, to establish this higher political ideal and extend a system of law therein throughout the world, people must be shown intelligently how to care for their own needs without relying on government programs. To this end, Zion must become ensigned to the world, showing that social and economic problems can be solved in the framework of freedom, with socializing the state.

As one expression of this ideal, I cited D.C. 78:13 where the Lord states that we must develop Zion's economic program and become "independent above all other creatures beneath the celestial world." (This includes being independent above all governments and government-sponsored programs of social welfare.) so that the Saints might fulfill their responsibilities in establishing a peaceful world of under the Kingdom of God.

**MY COLLEAGUES LABELED** this an "ill-defined ideal." The truth is, I did not intend to analyze, but merely to state the ideal. I am also accused of obtaining a "minimum of mileage from a minimum of scripture" and of making "spectacular" broadjumps in reasoning from fundamental points. In all this, I seemingly demonstrate a great "acrobatric ability." But here I am willing to let my editorial speak for itself concerning these charges.

To top the whole thing off, now I am supposed origin to have discussed—in two brief columns—all the details pertaining to the Bill of Rights and subsequent amendments including the prohibition issue, judicial review, and Constitution in light of an agrarian versus a complex industrial society.

I am willing to let an enlightened studentbody judge for themselves on who has been giving them a "reveler and accurate treatment" of the facts. As for me, I can conclude that their so-called criticisms have been mere play on words and are founded upon the approach of making a man an offender for a word—or for omitting a word. Regardless of any future temptation or provocation, I will conclude my part of their so-called argument.—F

## Cougars capable of much better ball

Pratte  
Sports Editor

Nowhere on these pages is the unfortunate account of BYU basketball team which almost passed away during Christmas holidays. Granted, the Cougars were in a tough schedule against such hungry teams as Montana State, Air Force and Arizona and Arizona State II oppose BYU in the newly-formed Western Athletic conference next year. In addition the Blue and White were without the services of dependables Bob Skousen and Wilson who both sustained ankle injuries.

However, we feel the Cats are capable of playing a better ball than the 2-6, including two losses at home, holiday mark shows.

It is not that Coach Stan Watts doesn't have the horses in the ar. He definitely does, and the Cat bench has about as much talent as the BYU Program Bureau. The trouble is they won't pull together as a team. Unless the team improves considerably Cougar fans are going to be in for a sad season in a conference which is going to be tough in its last year.

### CONFERENCE PROGNOSTICATIONS

In speaking of the Skyline Conference it's that time again to get out on the limb and make a few wild guesses on final standings in March. So here goes:

**THE AMERICAN** Bill McGill with lotsa help from Bo Tom Farrell and Joe Aufderhild should take the crown.

**THE PACIFIC** In spite of the Utes' humbling loss to USC in the Los Angeles tournament we think the Redskins have the scorch to take the title outright from Colorado State. The Utes were forced to share the crown with last year.

**THE MOUNTAIN** In spite of the Rams, mostly because of the loss of guard Kay and will slip to third in front of the Utah State team who will improve on last season's 4-10 conference record and tie with Brigham Young for third.

**THE SOUTHERN** Utah has the depth where the Ags do not, and the Blue and White could retain their last year's position if they show a little more hustle and team play than they did in their 12 games.

**THE PACIFIC NORTHWEST** MONTANA, WITH 6-7 center Steve Lowry, the nation's 21st best rebounder, and guard Bob O'Billovich who could well enough to have been drafted by the St. Louis Cardinals, should push the Cats for fifth spot.

**THE SOUTHERN** Coach Bill Strannigan's Wyoming Cowboys could upset the Denver Pioneers for sixth place, in spite of DU's tie outlook.

**THE PACIFIC NORTHWEST** New Mexico can get out of last place but will have to outplay the Cowboys and Pioneers to do it.

## MSC wrestlers meet Brigham's in home battle

Seven freshmen will be included on Coach Clint Whitfield's 1962 wrestling team when they take on Montana State College at the Fieldhouse in the first meet of the season Friday.

**COACH WHITFIELD** said the grunt 'n' groan artists would perform on the main floor on a new mat beginning at 8 p.m.

The meet regularly scheduled for Dec. 16 was rescheduled for Feb. 2-3 in Bozeman when a four-team meet will be held with MSC, Utah State, North Dakota State and BYU participating.

Following is the wrestling schedule for the remainder of the year:

Jan. 5—Montana State College at Provo

Jan. 11—San Fernando Valley State College at Los Angeles (afternoon)

Jan. 11—Long Beach State College at Long Beach (evening-tentative)

Jan. 12—California Polytechnic at Pomona

Jan. 13—Los Angeles State College at Los Angeles

Jan. 20—University of Utah at Salt Lake City

Jan. 26—Western State College at Gunnison

Jan. 27—Mess Junior College at Grand Junction

Jan. 30—Open

Feb. 2—4-team meet at Bozeman

Feb. 3—4-team meet at Bozeman

Feb. 9—Washington State University at Provo

Feb. 10—Utah State University at Logan

Feb. 16—University of Utah at Provo

Feb. 23—Utah State University at Provo

Feb. 24—Four-way meet (Utah; BYU, USU, and Denver) at Salt Lake City

March 2 & 3—A.A.U. March 9 & 10—Conference Meet

Junior Varsity Jan. 18—Snow College at Provo, 3 p.m.

Feb. 16—Snow College at Ephraim, 6:45 p.m.

## Daily Universe SPORTS

Visit Montana Saturday ...

## Hibernating hoopsters show 2-6 holiday mark

by Alf Pratte  
Universe Sports Editor

BYU's basketballing Cougars will try to shake off some of the hibernating habits they developed over the Christmas vacation when they trek to Missoula for a battle with the Grizzlies Saturday.

**IT WILL BE** the first Skyline Conference game for the Blue and White who have a 4-8 won lost mark in pre-league play. This includes a disastrous 2-8 record during the holiday period.

The Cougar's twin wins came at the hands of Oklahoma 81-74 at Norman, and the University of Pacific 69-67 at Provo.

**AIR FORCE** Academy and San Jose State were the other visiting squads that shamed the Cougars on the Fieldhouse floor although the visitors needed assistance from the men in striped shirts in a pair of wild encounters.

In the Air Force fight the officials refused to acknowledge a BYU time-out in the first seconds of the game and left the Cats holding the ball with time ticking away, and the Falcons ahead 66-66.

**SAN JOSE** won its first game in Utah by a 80-54 mark with Spartan forward Bill Robertson pacing the way with 22 points. Guard Gary Bachel-or was high for the "Y" with 12 points, ten of which came on free tosses.

The Oklahoma State battle was Cowboy all the way. OSU controlled the ball most of the game to net the 81-44 victory.

**BYU GUARD** Ron Steinke stimulated the Cats to victory over the Sonners the following night with 24 points in the other interconference game in Oklahoma.

Back home at Provo a sensational tipin by Bob Skousen who came up with the ball after Steinke had stolen it

from a UOP player with 14 seconds remaining gave the Brigham their second win.

**SKOUSEN** WAS also high scorer with 21 points while Steinke followed with 18 and Gary Bachel-or 18.

Leo Middleton was tops for the Tigers with 20 while Jack Schallow had 19.

**THE COUGARS** stood and watched Aggie George Knight-on set a school scoring record of 40 points in Las Cruces as New Mexico State cut the Cats 70-64.

Jim Kelson with 14 and Skousen and Burton with 13 apiece were high for BYU who ran into a cold streak after leading most of the second stanza 70-64.

The Cats repeated the freezing act in Tucson for the first 14 minutes of the second half as Arizona nudged the Brigham 60-58.

## 'Mural activity ready to resume

Basketball and other intramural activities will resume Wednesday, director Jay Naylor announced.

Mr. Naylor also said that the closing date for paddleball singles would be Friday, Jan. 5. Bowling entries close Jan. 11.

Play will continue in the school volleyball playoffs and checker and chess entries are now open, Mr. Naylor said.

## Big Bowl results

(Rose Bowl)  
Minnesota 21, UCLA 3  
(Sugar Bowl)  
Alabama 10, Arkansas 3  
(Cotton Bowl)  
Texas 12, Mississippi 7  
(Orange Bowl)  
Louisiana St. 25, Colorado 7

## Power from below

The Lawrence Radiation Laboratory is working in the areas of Nuclear Propulsion, Controlled Thermonuclear Reactions, Nuclear Explosives for Industry and Defense, Space Physics, and other advanced problems in Nuclear Physics and Engineering.

ON JANUARY 12

Laboratory staff members will be on Campus to interview outstanding students in the Physical Sciences and Engineering.

Call your placement office for an appointment

**LAWRENCE RADIATION LABORATORY**

at the University of California  
Berkeley and Livermore, California

An artist's conception of Project Gnome, a step toward providing power and isotopes from underground thermonuclear detonations. This area of endeavor is part of Project Plover, initiated at the Lawrence Radiation Laboratory of the University of California. Other Plover projects under study include the excavation of an experimental harbor in Alaska, production of oil from the sands, control of groundwaters, mining applications, and other novel ideas using the energy of nuclear explosives.

## Salt Lake firm gets contract on Physical Plant Building

(Continued from page 1)  
space and the second floor 41,538 square feet for a total of 83,853 square feet of floor space.

## Alumni to donate books to library

Books will be donated to the library as a project of the Emeritus Club of BYU alumni, Ray Beckham, alumni secretary, has announced.

The Emeritus Club is composed of alumni who attended BYU 50 or more years ago. The project to donate books was voted upon at the Emeritus Club annual meeting during commencement time in 1960.

It was put into effect about a year ago as a perpetual project, Mr. Beckham said.

Members are being urged by Emeritus Club President George Higgs of Rosemead, Calif., to look in attics and elsewhere for old books.

They may also give money to the library and a book will be purchased in their names, Mr. Beckham said.

## Recruiter tells of careers in Air Force Nurse Corps

Students interested in a career in the U.S. Air Force Nurse Corps now have the opportunity to receive a direct commission in a grade commensurate with their age, education and professional experience.

According to Sgt. Albert A. Ponsack Sr., local Air Force recruiting representative.

BOTH MALE and female nurses are eligible for the commission which will enable them to enjoy the same pay and privileges as other Air Force officers, Sgt. Ponsack said.

To qualify, a nurse must be between the ages of 21 and 35, a U.S. citizen, and a graduate of at least a three-year school of nursing acceptable to the A. F. Surgeon General.

Further information can be obtained by contacting Sgt. Ponsack in Room 4 Post Office Bldg. Provo, or by calling FR 3-6820.

not counting the inner court.

The extra space on the first floor is the result of an extension on the northeast corner for lubrication, painting and washing of university vehicles.

The unique building is designed for maximum utility. Trucks and other vehicles may enter the upper central court through a large passageway through the building on the west and reach all areas of the second level.

And while it is a two-story building, every room or shop on the first level can be reached by truck from the lower court.

ORNAMENTAL WALLS and landscaping will be placed in front of the building on the south and east sides.

Near the main entrance at the northwest corner on the second floor are the administrative offices—those of the director, engineers, building inspectors, conference rooms, drafting rooms, plans storage room and vault, blueprint room, building material sample rooms and clerical offices.

On the southwest side of the second floor are the custodial service offices for supervisors, scheduling office, key office, workshop for custodial equipment and furniture.

THE SOUTH side of the second floor will be occupied by the carpenter shop and the southeast corner will contain the mechanical shop, which involves heating, water systems, welding and machine repair.

The east side of the second floor will contain the air conditioning shops, electrical shops, transformer room, lumber storage and stock room.

Approximately two-thirds of the north side and half of the west side of the first floor will be storage. The south half of the west side first floor is scheduled for custodial storage.

The south side of the first floor will be occupied by the general services which involve a large number of operations—landscaping, irrigation, road maintenance, walks, parking, grading, waste removal, automotive repair, motor pool and signs and barricades.

The motor pool, for 16 cars, and automobile repair shops will be on the east side. It will include a large garage with all necessary repair equipment.

## Search for leather

"Leather goods are desperately needed by the costume shop to make old leather boots for the play Cyrano De Bergerac," said Miss Carol Michie, head of the BYU costume shop.

If any students have old leather jackets or other used leather goods they don't want, they can turn them in to Miss Michie at the costume shop at A-14, Wymount Bldg., on the second or third week in January.

## 'Twist, Hully Gully' ...

by Eddie Gries

Universe Staff Writer

"Dancing itself is one of the best forms of enjoyment. But it is the movements that some people put into the dances that make them improper," said Benjamin P. DeJoyos, dancing instructor at BYU, referring to the modern dance crazes which have caused concern among church and school leaders.

The increasing popularity of record hops both on and off campus has caused many to feel that such dances as "The Twist," "The Hully Gully," "The Slop," and others have no place at this church university.

PROF. DEJOYOS explained there is no need to include these indecent movements in the dances since the LDS Church has a complete dance program.

These new dances, involving improper movements, "do not belong on this campus, or on any ballroom floor," Prof. DeJoyos said. "Instead, they belong in taverns, joints, or other cheap places."

THESE IMPROPER positions, along with the steps and the desire that accompany them, are part of an act of introduction to some other act," he said.

Dr. Kay H. Smith, instructor in the Psychology Dept., in explaining his views on the origin of these dances, said "it is possible they are symptom of a desire for freedom and self-determination of the younger generation."

These natural drives and urges are present, but the culture has taboos and restrictions which are against the expression of these drives, and these dance movements could be a form of expression of them," he said.

Dr. Smith said since there is little body contact in the new dances, it is possible they are a form of exhibitionism or showing-off.

BOTH AGREED that equal danger lies in watching these dances as in performing them. Prof. DeJoyos said "the members of the LDS Church and as students at this University, we have a responsibility for our actions and character."

Dr. Smith explained it is just as possible for an onlooker to be affected by the improper movements in these dances as it is for the dancers themselves, and he compared it to watching burlesque shows.

Dr. Smith, in discussing whether or not the standards at BYU would make the natural desires less likely to come

forth, stated: "The danger at BYU is that here, due to the Church influence, there is a stronger repression of desires, therefore causing people to seek after a more acceptable outlet according to the social norm. These dances could be felt to take the place, for some students."

Milt Barnes, chairman of the Central Dance Committee, said rather than say some of these dance movements are allowed and some are not, students should be made to see just why they should not do them.

"MANY OF THESE dances,"

Barnes said, "are not justive in the good sense, should be present a dances. Since our dance opened and closed with wisdom and moderation, it be used during them."

Although it has not been the point of strictly out any of the dances, the committee does not condone "Twist," or "The Hully Gully" according to Barnes.

"It is up to each one to maintain the spirit of gospel at these dances, and this to the spiritual where," he said.

## THE LANGUAGE OF SECURITY AEROSPACE VOCABULARY

IT'S A PROTOTYPE, POP—A MODEL THAT IS SUITABLE FOR COMPLETE EVALUATION OF FORM, DESIGN AND PERFORMANCE. IT FOLLOWS AN EXPERIMENTAL MODEL AND PRECEDES THE PRODUCTION MODEL.

SPACE GUN—Early proposal for a space gun at altitudes up to 100,000 feet from the surface of the Earth, but now abandoned in favor of the space shuttle launching.

SPACE WARFARE—Warfare conducted by use of weapons brought to bear upon Earth targets from space, or brought to bear upon targets in space.

THEATRIC RAPID FIRE—The zone of space at which traffic best generated by rapid passage of an object through the atmosphere causes maximum commotion with the function of the show.
